

Benefits of Good Social Media Presence

- Drives traffic to your company
- Generates customers
- Increases brand awareness
- Builds relationships
- Keeps your company relevant and front of mind

Essentials of a Successful Strategy

Knowledge of Your Audience
What platforms they use, when they go on them and why, what content they like, who else they're following, and more.

Analytics
Quantifiable insights will inform your strategy, including the right content to share, the best times to post, and more.

Brand Identity
What is the message you want to convey to your audience? How do you want them to feel when viewing your content?

Regular Activity
Post at regular intervals to keep customers engaged and informed. Keep them up to date on promos and events.

Content Strategy
Create a schedule and plan out your posts, to be able to have a consistent voice and produce quality content regularly.

Inbound Approach
Focus on adding value through useful and interesting content, and building up those around you.

Versatility Across Devices
Ensure that your content is both computer and mobile friendly.

Raise Brand Awareness
Retain loyal users and attract new customers.

Creating your Social Media Marketing Plan

Choose Your Platform

- Choose platforms based on your target audience and which platforms are platforms are popular in your industry
- Only take on the number of platforms you can keep up with
- You can re-use content across platforms (you don't necessarily need to create new content for each platform)

Set Goals & Objectives

- Create simple tasks to start (ie. one post a day for a month)
- Gather insights and do a competitive analysis to help create specific and strategic goals

Report & Adjust Regularly

- Use each platform's analytics to identify which posts generate the most engagement
- Analyze your growth in followers and audience demographics
- Identify and scale up what works and fix or nix what doesn't

Social Media Content Management Software

What are Social Media Management Systems?

A social media management system (SMMS) is a system you can use to manage interactions with customers and monitor the different types of social media conversations you're having. They can pull in information from across your social platforms and help you manage your content.

You can learn more about SMMS from the Digital Marketing Institute's Social Media Management Course.

The following are some examples of SMMS's:

- Buffer
- Hootsuite
- Sprout Social
- Agora Pulse
- Sendible
- eClincher
- Social Pilot
- Later
- MavSocial
- Crowdfire
- SocialBee
- Post Planner
- Tailwind
- Bandwatch
- HubSpot
