# Product Video's
## Best Practices & Tips

### What is a Product Video?

Product videos are ads that highlight your product's features and show it in action.

### Why are Product Videos so Important?

Buyers are known to engage more with video content. Product videos are often better at explaining the product to the buyer, boosting buyer confidence in your brand, and increasing sales conversion rates.

### Benefits of Product Videos

- Establishes the personality and aesthetic of a specific product
- Show how the product works by showing the product in action (bringing the product to life)
- Demonstrates how the product can help the prospective buyer to achieve their goals

### Video Considerations

1. What problems does your product solve for the buyer?
2. How does it improve your buyer's lives for the better?
3. What else can your buyer achieve with your product's potential?

### Video Kit Suggestions

**Beginner Video Kit**

- Smartphone with a microphone
- Tripod
- Ring light

This type of equipment is great for creating product videos, sales videos, video blogs and any video on a budget.

**Intermediate Video Kit**

- DSLR camera with a 50mm lens
- Wireless microphone
- Tripod
- Lighting kit

This type of equipment shoots higher quality footage for flattering testimonials, scripted videos and assets.

### Video Editing Software

- HitFilm
- OpenShot
- DaVinci Resolve
- VideoPad
- Lightworks
- Canva

*Please note that the Ontario Chamber of Commerce does not promote or endorse any 3rd party vendors. This resource is provided is for example purposes only.

# Tip Sheet

## How to Make a Great Video

- Speak lower, slower and with certainty
- Wear solid colours
- When interviewing, let the conversation flow naturally
- Ensure customer stories have a 'Who', 'What' and 'How'
- Find a well lit, quiet place to film
- Get to the point quickly without too much fluff

## Pre-Production

- Charge all your devices the day before
- Bring chargers and extra batteries
- Scout your locations ahead of time to make sure they'll look good on camera
- Mark off areas where you will be filming with caution tape or traffic cones

## Key Production Attributes

**Lighting**

- Use key lighting for the subject's "good side"
- Use fill lighting to illuminate the subject's other side
- Use a background light behind the subject to make them stand out from the background.

**Length**

As a rule of thumb, product marketing videos should be under 2 minutes.

- Instagram: 30 seconds
- TikTok: 25-30 seconds
- Facebook: 24-90 seconds
- LinkedIn: 30 seconds - 5 minutes
- YouTube: 15-20 seconds
- Twitter: 20-45 seconds

**Shot Composition**

- Use the Rule of Thirds
- Avoid filming in portrait mode

**Audio**

- Test your audio before filming
- Have subjects speak into the mic (place body mics on chest, so they are not too close)

## Post Production

- Upload your raw video to the editing software of your choice
- Trim footage where necessary
- Arrange clips in correct order and add effects if desired
- Add voice over or background music as needed
- Edit audio and correct colour as needed
- Edit the final video clip
- Export and save
- Upload to your desired content sharing platforms
